

# ISOBEL DRANE & KIERAN LOWLEY

## Directors and Screenwriters

Isobel and Kieran are screenwriters and working directors whose expertise lies in challenging virtual production heavy content, all working under their Red Robin Films production banner.

They have a significant mastery of virtual production, having recently partnered with Sony Europe and Zeiss to write, direct and produce the world's first virtual production short film utilising the Sony Burano and Verona CLED Wall in parallel. This short sci-fi film is being used as core marketing for Sony's new technology, and is one of the world's first productions to use Zeiss's new acinCraft Scenario system.

Their films feature character-driven, intimate narratives set within large-scale contexts and worlds, and are written in various genres. [www.redrobinfilms.com/](http://www.redrobinfilms.com/)
